SEASTAINABLE VISION

STORIES OF CHANGE

Inspiring case studies from Positive Members

FROM WASTE TO VISION

Positive founding member, Sea2see collaborates with fishing communities in 27 ports of Spain and 10 coastal areas of Ghana in order to collect discarded marine plastic waste made up of fishing nets, rope, lines, and bottles.

The UPSEA waste collection program is active in Ghana and Senegal, where coastal waste collection was once inexistent. They give value to this discarded waste and reward the fishermen for what they collect, with a direct impact both on the environment and by empowering their communities.

150 containers have been placed in 27 Spanish ports in order to collect discarded plastic waste. They collect on average 500 kg per day. 90% of what is collected will be recycled. Only 25% of the polymer collected can be used to manufacture glasses.

Plastic waste is then up-cycled into a reusable raw material certified by the highest possible circular standards: UPSEA™ PLAST Cradle to Cradle™ Gold Certified.
