STORIES OF CHANGE

Inspiring case studies from Positive Members

NATURAL SNACK BOXES

The concept behind Positive founding member, Healthy Nibbles, came about when its Founder, Sara, was visiting her father in hospital. She was struck by a stark irony: all over the hospital she saw posters warning people of the negative impact of obesity on their health, yet the only snacks that people could access in the hospital were processed crisps, sweets and chocolates from a vending machine. From this, she founded Healthy Nibbles' mission to make healthy options as readily available on-the-go as unhealthy.

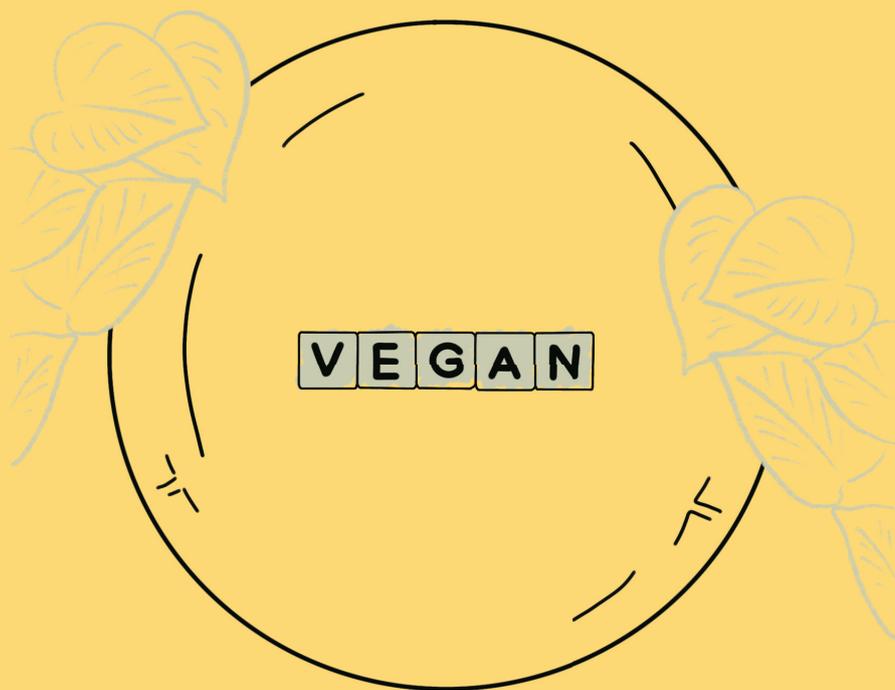

Life-style related diseases are on the rise globally, not only impacting people's quality of life but placing a strain on medical institutions. In fact, poor diet causes more deaths than lack of physical activity, alcohol, and tobacco combined, attributing 1 in every 7 deaths within the UK and 11m deaths per annum globally.

HEALTHY NIBBLES

Working across the UK and Europe, Healthy Nibbles is targeting endemic unhealthy workplace culture of the modern world by offering companies the chance to save money and improve the quality of life of their employees. Their tech-enabled vending machines allow consumers to search for products via dietary requirements and display nutritional information on screen prior to purchase. Stocked with carefully sourced products which support small businesses, their machines are also fully accessible to wheelchair users with inbuilt technology. They're built with the environment in mind too: 78% recyclable at the end of their lives and equipped with a carbon neutral option. They're also designed to be 50% bigger than traditional machines, resulting in fewer refills and a reduced environmental impact.

With an aim to roll out these changes across the world, Healthy Nibbles is taking steps to disrupt our harmful convenience culture from the inside.
